

A year in the RANZCO Museum

The Museum has received many donations at an increasing rate. Thousands of surgical instruments as well as very large pieces of equipment ranging from giant perimeters through early phacoemulsification machinery and fundus cameras are stored at the CAVAL centre, La Trobe University.

Many pieces of equipment require cleaning and restoration before storage.

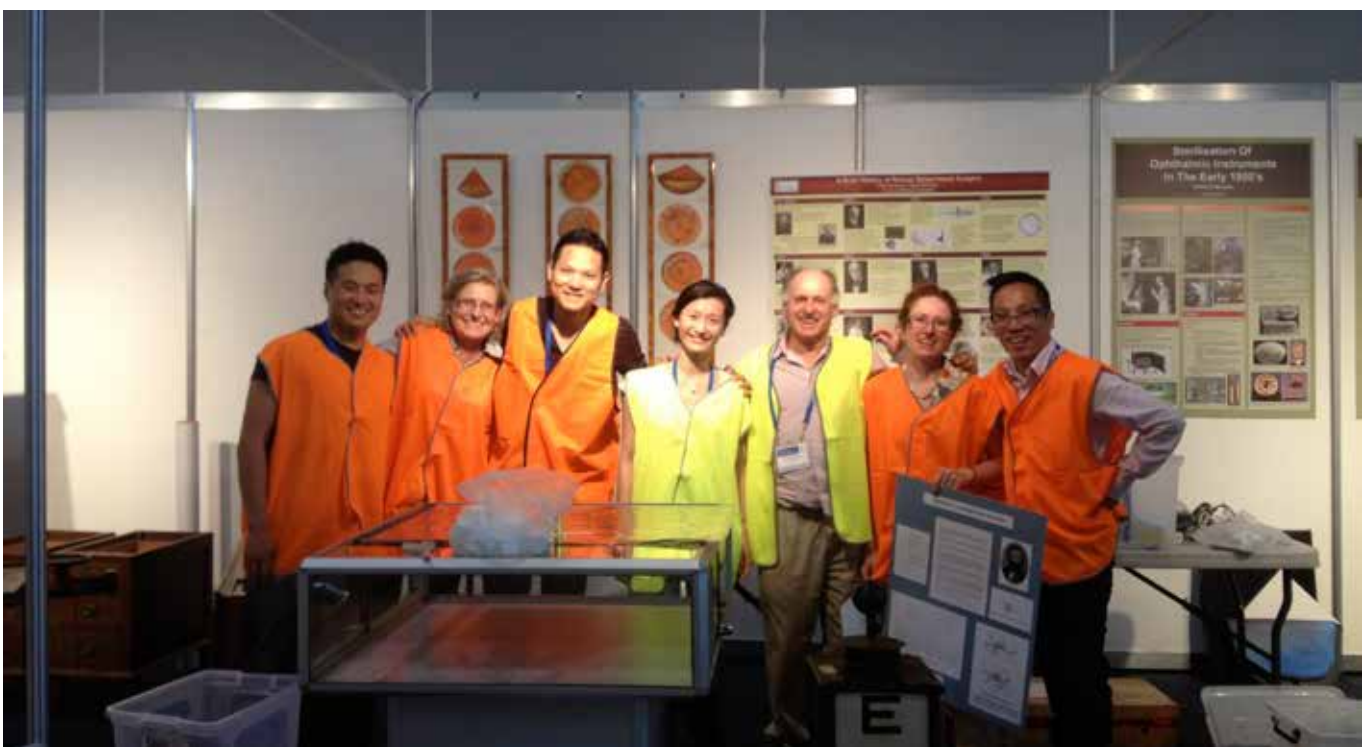

RANZCO Congress displays take months to prepare and design. The layouts are mocked up before transport to the conference site where the exhibit is assembled in a tight time frame. Many thanks to our donors and helpers.

Dr David Kaufman, RANZCO Museum Curator and Mrs Kirsten Campbell
